JACKPOT

Overview

The Local Progressive Jackpot is a bonus game which is accumulated from all bets from players.

It can be deployed for a single slot, groups of slots and for mixed configurations when some jackpots belong to a bank of slots and other jackpots belong to a single slot.

The Local Jackpot is hit when the accumulated win value reaches a level between “Minimum Trigger Amount” and “Maximum Trigger Amount”. Hit level value is chosen randomly.

DAILY JACKPOT

Overview

Daily Jackpot is very similar to plain progressive Jackpot.

The difference is the triggering event. It is time, not accumulated amount - Daily Jackpot is hit when the current time reaches a value between the "Start" and "End" values set by an operator. Exact time is chosen randomly.

TOURNAMENT

Overview

A tournament is a special event that gives players the opportunity to win Cash prizes or Bonus Rounds with instant rewards, or even choose between different prize options after a winners list is generated.

Players can check their current results via real-time leaderboards.

Tournaments could be applicable to all BF Games slots or limited to specific slot qualifying games. We can create themed tournaments, for example, "Classic Slots", "Ancient", "Wild West", and more.

We can choose from a wide range of available winning criteria.
